To Whom It May Concern:

I have employed Weller Construction, Inc, for various projects over the last five years and am pleased to write a letter of reference for them.

The scope of work has run from adding shielding to an existing vault to building out 10,000 sq feet that included two linear accelerator vaults, a Cyberknife vault, and a CT suite along with all the additional clinic space. No matter how large or small the project, I experienced the same level of exceptional professionalism and cooperation.

I have worked with a multitude of contractors over the years but there are only a few to whom I have given repeat business. As I mentioned in my opening statement, my professional relationship with Weller Construction, Inc. has been on-going for 5 years and 4 projects.

I have found Mr. Weller and his crew to possess the ability to communicate well with others in the industry to work through issues that inevitably arise during projects. They were consistently courteous, honest, and reliable. Mr. Weller's experience in the field of vault design is invaluable.

Please do not hesitate to contact me if you have any further questions.

Patricia A. Wilber
